

Vidyavardhaka College of Engineering
Department of Computer Science and Engineering

Project List 2022-23

Sl. No.	Project Title
1	Detection of mental health issues and solution to online toxicity in modern times using machine learning
2	Knee Osteoarthritis detection and its severity
3	Cotton plant disease detection using deep learning
4	Biometric based Medical Services
5	Accident Severity prediction with machine learning
6	Interpreting doctors notes using handwriting recognition and deep learning techniques
7	Classification of cancerous profiles based on type, stage and genetic heterogeneity using machine learning
8	Conference and paper submission System
9	Cervical spine fracture detection using deep learning
10	Hand tracking model and AI based virtual mouse using computer vision
11	Food Image Recognition for price calculation
12	Brain tumor detection using machine learning
13	Car crash detection and reporting in signals using deep learning approach
14	IoT Based End to End Mechanism for Detecting the quality of milk
15	Machine learning model for crude oil and petroleum products price prediction using relevant datasets
16	Stroke disease and its stage prediction using deep learning

17	Foodie App with Cloud Computing
18	Pothole Detection and Alert System for effective traffic navigation
19	Parkinson's Disease Detection using Machine Learning
20	Detection of OKRA Disease
21	Optical Coherence Tomography for Retinal Diseases Classification
22	Agriculture Advisory System using Machine Learning
23	Detection of Transiting Exo-Planets
24	Mapping of facial expression to EMOJIS with authentication
25	Smart Attendance System
26	VVCE Student Manager App
27	Spatiotemporal information system- Perspicacity Ambulance
28	IOT based master slave waste water management for industry
29	Unusal crowd activity detection using OpenCV and Motion influence Map
30	Automatic protection of clothes from rain
31	Smart helmet detector for safe driving
32	Student performance analysis using ML technique
33	An effective and real time application for stress prediction using ML
34	Detection and identification of bone trauma using Machine Learning
35	Predicting Autism Spectrum disorder using brainimaging data by graph convolutional network

36	Carbon emission prediction using artificial intelligence
37	Detection of Alzheimer's disease using deep learning
38	Real time application to improvise business profits in e commerce
39	Smart Script Evaluation System
40	Skin Disease Detection
41	Mime Vernacular Interpreter to Aid the Speech Impaired
42	Smart Agriculture with recommendation & disease detection system
43	Tomato leaf disease identification using CNN & deep learning
44	A smart healthcare ecosystem
45	Handwritten kannada character recognition in an unconstrained environment using hybrid learning technique
46	Supply chain management using machine learning
47	Pneumonia detection from X-ray images
48	Smart agriculture system for crop yield prediction using machine learning
49	Detection of skin cancer based on skin lesion images
50	Conversion of sign language to animation
51	GDP & life expectancy
