

Vidyavardhaka Sangha®, Mysore
VIDYAVARDHAKA COLLEGE OF ENGINEERING

Autonomous Institute, Affiliated to Visvesvaraya Technological University, Belagavi

(Approved by AICTE, New Delhi & Government of Karnataka)

Accredited by NBA | NAAC with 'A' Grade

Department of Computer Science & Engineering

Phone: +91 821-4276230, Email: hodcs@vvce.ac.in

Web: <http://www.vvce.ac.in>

@vvceofficial

Sl.No.	Topic
1	RecipeSnap : image based recipe Extraction
2	Sign language translator to text and speech in real time
3	Multi-Server Private Set Intersection Platform for Secure Computation
4	Prediction and Detection of Kidney Stone
5	Per-Eye: spy detector
6	Healthcare Application
7	EduBot: A Chatbot for Educational Institutes
8	An IOT framework for effective Railway looping and obstacle detection
9	NyayaDhvani - Voice based legal query agent
10	Voice Control Robot
11	Comprehensive Monitoring fo Deminitia Patients
12	Railway waste management system using IoT
13	To identify how Student Health factors correlated with their Performances using ML algorithms
14	Video surveillance and tracking system using facial recognition
15	Multimodal Learning System
16	Glaucoma Detection using Deep Learning Techniques
17	Detection of Spinal Cord Injuries
18	IdentityQuest : AI Powered Tracking of Missing Individuals
19	Data Me-Student Notification system
20	sentimental analysis for business using deep learning
21	Potato Disease Identification and Classification using Deep Learning
22	Enhancing customer centric services in real world and online shopping through personalized recommendations and targeted advertising
23	AUTONOMUS CAR
24	Crowd Funding Decentralised Web App
25	DIGITAL DOCTOR
26	SENTIMENT ANALYSIS USING ML
27	Old photo restoration via deep latent space translation
28	Cuisine Compass
29	Medical based Decision Support System for Diabetes and Reverse Diabetes using ML Algorithms
30	Physio Finder

31	Auto Mishap Detection Using IOT
32	CropSafeguard
33	Automated Educational Management System
34	E-Learning Website
35	Detection of Malicious Attack using Supervised Machine learning
36	AI-Powered Intrusion Detection System
37	Evolving operating systems: Building and securing the ecosystem
38	Ultrasound Nerve Segmentation using Deep Learning
39	Benchmarking reinforcement learning algorithms in different gaming environments
40	Precision in Human Detection and Re-Identification
41	IntelliCrop:Major Cropping Pattern using machine learning techniques
42	Wearable Situational and Tactical Awareness Kit (WSTAK)
43	SecureCloud: Fragmented Data Distribution for Enhanced Confidential Computing
44	A Mobile Application for visually impaired individuals
45	Fake News Detector
46	Farm-Flex
47	Sales Prediction based on Ads using Machine Learning Techniques
48	Apna EV: The ultimate charger pooling App
49	Collision Detection System
50	Harmonizing Diverse Voices:Translating and Summarizing Regional Languages for Unified Communication
51	Learning Spatiotemporal features of Esophageal Abnormality Detection from Endoscopic videos
52	Adapting Single-Speaker Models for Multi-Speaker Environments
53	A Full-fledged Application to Find IT Employees Stress Levels using Machine Learning Algorithms
54	Graphflex: Dynamic Data Visualization Platform with Customizable Charts and Profiles
