

Job Title: Android Developer (Kotlin + Jetpack Compose)

Location: Hybrid – Work remotely with one week per month onsite in **Shivamogga, Karnataka**

Company: Unriddle Technologies

Product: DScript – Revolutionizing hospital workflows

About Us

At **Unriddle Technologies**, we're on a mission to empower healthcare providers with cutting-edge technology that streamlines workflows and enhances patient care. Our flagship product, **DScript**, is a tablet-and-stylus-based solution that digitizes in-patient records effortlessly, helping hospitals reduce administrative load and increase focus on what matters most – **patients**.

Key Responsibilities

- Develop and maintain Android applications using **Kotlin** and **Jetpack Compose**
 - Design and implement modern, declarative UIs with smooth transitions and state management
 - Architect clean and scalable solutions using **MV/ViewModel/Repository** patterns
 - Integrate and handle **RESTful APIs** with **Retrofit**, including robust error handling and token-based authentication
 - Manage local data storage using **Room database** and model complex entity relationships
 - Implement **DataStore** for managing typed and key-value preferences
 - Integrate **WebSocket**-based real-time features using tools like **OkHttp**
 - Debug, profile, and optimize app performance using **Android Studio tools**
 - Ensure best practices in **code structuring, version control (Git)**, and **clean architecture**
 - Collaborate closely with designers, product managers, and other engineers to deliver seamless user experiences
-

Required Skills & Experience

- Proficiency in **Kotlin** and a deep understanding of the Android SDK and lifecycle
 - Hands-on experience with **Jetpack Compose** and modern UI development
 - Strong knowledge of architectural patterns: **MV**, **ViewModel**, and **Repository**
 - Proven ability to integrate and handle **REST APIs** with **Retrofit**
 - Solid grasp of **Room database** and **DataStore**
 - Experience implementing **WebSockets** for real-time updates
 - Comfort with tools like **Android Studio**, **logcat**, and **profilers**
 - Familiarity with navigation components and smooth **screen-to-screen transitions** in Compose
 - Strong sense of code quality, architecture, and versioning with **Git**
-

Work Environment

- **Hybrid Setup:** Flexible remote work with **1 week/month onsite** at our Shivamogga office
 - A mission-driven startup environment where your work directly impacts patient care
 - Opportunity to work with a passionate, cross-functional team in a high-growth space
-
